#### **DETAILED ACTION**

Page 2

#### Response to Arguments

1. Applicant's arguments with respect to claims have been considered but are moot in view of the new ground(s) of rejection.

### Claim Rejections - 35 USC § 103

- 2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 3. The factual inquiries set forth in *Graham* v. *John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:
  - 1. Determining the scope and contents of the prior art.
  - 2. Ascertaining the differences between the prior art and the claims at issue.
  - 3. Resolving the level of ordinary skill in the pertinent art.
  - 4. Considering objective evidence present in the application indicating obviousness or nonobviousness.
- 4. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to

Application/Control Number: 09/981,982

Art Unit: 2617

consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

5. Claims 3-5, 9-11, 16-17 and 20-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sivula (US 6,795,711) in view of Adachi US006829474B1.

As to claims 3 and 9, Sivula discloses an information processing apparatus for use in a system comprising a mobile communication network and a broadband communication network connected via gateway to said mobile communication network (see fig. 2, item 14, 26, 32, 30; fig. 3, item 36), said information processing apparatus comprising: a processor receiving a content transmission request including a content identification of a content determined by a user and an address of a receiving device (see fig. 1, item 16) determined by said user which is to receive data of said content (see col. 7, lines 20-25,62-67), from a separate device (see fig.1, item 10) different from said receiving device over a mobile communication network, in response to the receipt of said content identification and said received address of said receiving device from said separate device, said processor transmitting, said received content identification and said received address of said receiving device to a content data providing information processing apparatus which provides said content data and which is different from said processor, wherein the content data is provided by said content data providing information processing apparatus, in response to the receipt, from said processor of said transmitted content identification and said transmitted address of said receiving device, to said receiving over said broadband network (see col. 5. line 66 col. 6, line 5; col. 7, lines 47-52; col. 8, lines 28-44; fig. 3, item 36, 46, 54, 62). Sivula

Art Unit: 2617

does not specifically disclose that the connection between the processor and the content data providing information processing apparatus is a broadband (high-speed) connection or. In an analogous art, Adachi discloses a content data information processing apparatus connected to the processor using a broadband (Internet) connection (see fig. 1, items 1, 6, 7), thereby permitting to connect various content server connected to the internet. Therefore, it would have been obvious to one of the ordinary skill in the art at the time of invention to use a broadband connection or any connection with enough broadband between the processor and the content data providing information processing apparatus to maintain a good transfer of data.

As to claims 4 and 10, Sivula discloses the information processing apparatus wherein said processor transmits a Web page containing said content identification to said separate device over said mobile communication network (see col. 7, item 49-53).

As to claims 5 and 11, Sivula discloses the information processing apparatus according to claim 3 wherein said processor transmits further a user identification of the user to said content data providing information processing apparatus (see col. 7, lines 23-25).

Regarding claims 16-17 and 20-22, are corresponding stored program claim of the apparatus claims 3-4 and 9-10. Therefore they are rejected for the same reason shown above.

#### Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37

CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE

Page 5

MONTHS from the mailing date of this action. In the event a first reply is filed within

TWO MONTHS of the mailing date of this final action and the advisory action is not

mailed until after the end of the THREE-MONTH shortened statutory period, then the

shortened statutory period will expire on the date the advisory action is mailed, and any

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later

than SIX MONTHS from the date of this final action.

Any response to this Office Action should be mailed to:

U.S. Patent and Trademark Office

Commissioner of Patents

P.O. Box 1450

Alexandria, VA 22313-1450

Or faxed to:

571-273-8300

for formal communication intended for entry, informal communication or draft communication; in the case of informal or draft communication, please label

"PROPOSED" or "DRAFT"

Hand delivered responses should be brought to:

**Customer Service Window** 

Randolph Building

401 Dulany Street

Alexandria, VA 22314
